

## Safes for Unique Settings

Environmental **sustainability** and high **craftsmanship** make Conforti Exclusive Safes top luxury products in the widest sense of the term: not only precious finishings in mother-of-pearl, but also strong connections to the territory by using marble and woven leather beautifully handcrafted by local artisans.

### Conforti Exclusive Safes at **Abitare il Tempo**, the Verona Design and Decor Exhibition

Palaexpo, Stand B23-24

From the 30th of September to the 3rd of October, the b2b showroom of Veronafiore **Abitare il Tempo** is back. Interior design operators and furniture manufacturers, exhibiting together with **Marmomacc**, confirm the internationality of the event, a unique opportunity to relate to the world of design.

**Conforti Spa**, a leading company in the production of **safes and security systems**, could not miss such an important exhibition. Conforti presents a unique product already appreciated in the Arab and American market. *Conforti Exclusive Safes* are **luxury safes**, they have been conceived to be exhibited and represent a history of great passion and high **artisanship** of over one hundred years: a story which since its very first beginning developed successfully and improved continuously.

*Conforti Exclusive Safes* are realized by skillful craftsmen with great expertise in processing precious materials (such as leather, wood, marble, or mother-of-pearl Superlativa) that adapt to the most **advanced security technology**. Conforti's challenge is to restore the original meaning of "masterpiece": a unique work of great artisanship, which combines safety with the charm and the beauty of extraordinary materials.

Conforti Exclusive Safes give back to the safes the original image of a precious handcrafted product, recalling the time of European competitions when safes' evaluation was based on the accuracy in details and the beauty in carvings, drawings and geometry.

Unique safes, whose functionality may also respond to an aesthetic purpose, come from a very accurate design combined with safety and with the ability of skilled artisans who belong to the **Made in Italy** tradition.

The safe becomes a decor element, each piece is unique and unrepeatable and satisfies the need for security through elegance.

That's why Conforti Exclusive Safes respond exactly to the new concept of luxury, as it will be explained during the Exhibition at the international conference "*Exclusivity and Sustainable Excellence of interior design*" by di Elisabetta de Strobel:

*"Today opulence no longer matches the **luxury concept**. Luxury and sustainability can meet, especially when the first finds its connections with the land traditions. Real luxury has two main features: quality and exclusivity in terms of price and offer. Sustainability too has two main features: the environmental and the social impact. When luxury and sustainability merge....."*
