

THE MALACHITE CONFORTI EXCLUSIVE SAFES

The century-old Conforti experience renews itself in the name of creativity. The EXCLUSIVE SAFES advanced design combines the concept of security with the innovative ability of skillful artisans who represent the great tradition of the “*Made in Italy*”. The functionality of the safe is reconsidered and redesigned for an aesthetic purpose, being aesthetics a main feature of the renowned Italian style. The result is a unique and unrepeatably safe, as the latest model in malachite.

In ancient times Greeks and Romans made amulets with malachite believing that it protected from injuries. Malachite was often used in the East and in Russia, for example as embellishment for the halls of the summer residence of the Tsars in St. Petersburg. This stone is now being used in jewelry and in the realization of precious objects for its special light and dark shades of green.

The outer coating of the safe consists of a double layer of malachite. Another significant aesthetic detail is the hinge column: the precious and thick brass work is performed by highly experienced artisans from the Conforti staff. The inside of the safe is supplied with warm led lights, with a light colored glass shelf and with two drawers. The green and soft inside cover of the drawers beautifully matches the outer malachite cover of the safe.
